Ten years of the Carolina Covenant making education possible

In 2004, when UNC first promised students from low-income backgrounds the chance to earn a Carolina education debt-free, the Carolina Covenant was the first program of its kind at a public university. Ten years later, after welcoming more than 5,200 students who might never have been able to afford UNC, the Covenant is widely emulated and acknowledged as one of the premier access initiatives in public higher education. We’ll learn about the history of the Covenant, its success in recruiting and graduating low-income students, and what the University is doing to secure its future.
